

Sales

A Single Source for Customer Information

Sage SalesLogix Sales provides the tools and resources needed to effectively manage all aspects of the sales cycle and increase team sales performance. It's a single repository for customer information captured across your entire organization that enables you to access detailed account and contact information, track opportunities from lead through close, manage team calendars and activities, forecast revenue, and report on sales activities and effectiveness.

The Information You Need, How You Need It

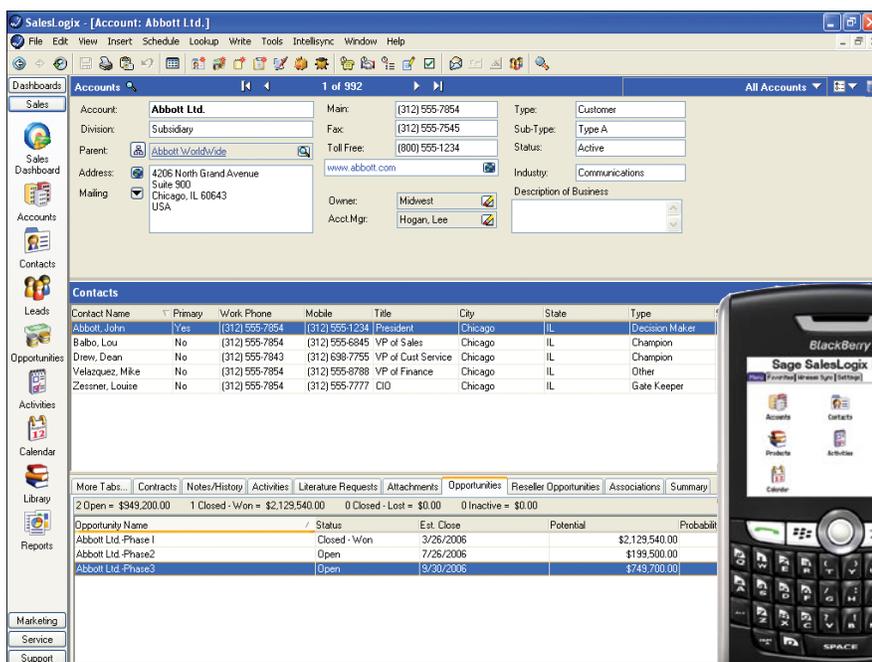

SalesLogix Sales provides you with the Freedom of Choice to select the deployment method best suited for your sales teams, without sacrificing functionality, usability, or robust customization capabilities. Users can work online over a network or the Web, synchronize rapidly and work offline, or use a mobile device for quick access to customer information in the field. Users can be more productive, as they always have access to the same key customer information.

Increase Sales Productivity and Performance

SalesLogix Sales helps drive opportunities through the sales cycle by automating activities such as follow-up calls, letters, and literature fulfillment, based on sales and marketing processes you define.

Sales professionals can send personalized communications to individual customers or groups of prospects using customized HTML e-mail templates. They can also track competitors and access the Sales Library for product specifications, FAQs, or marketing materials.

And, Advanced Outlook® Integration enables users to share contacts, send e-mail, and manage calendars using Microsoft® Outlook from within Sage SalesLogix, and record the activity to the Sage SalesLogix account history.

BENEFITS

Increase productivity by automating key aspects of the sales cycle.

Maximize team selling effectiveness with advanced sales tools and resources.

Make informed, profitable business decisions based on accurate visibility into the sales pipeline.

Customize to mirror unique business processes and to accommodate growth and change.

Integrate Sales with Marketing, Customer Service, Support, and Accounting for holistic customer account management.

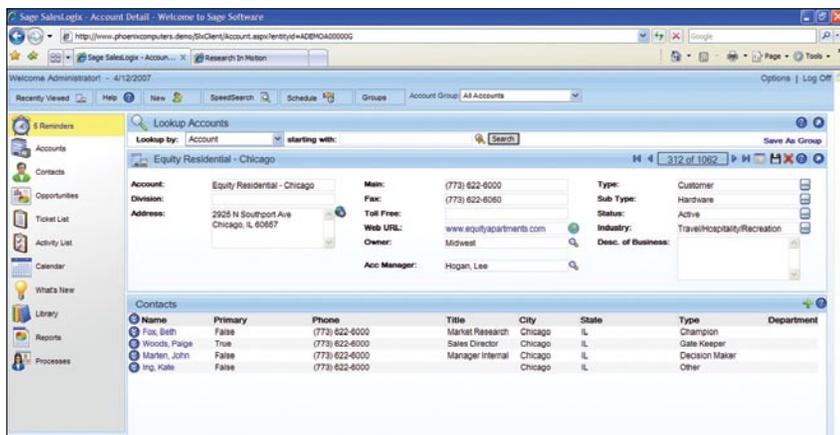

Insight for Informed Business Decisions

Sage SalesLogix Sales provides the insight for informed business decisions and the management tools to implement them. Access a real-time dashboard view of the sales pipeline in order to accurately analyze the revenue potential and probability of close in your sales pipeline. Segment your sales opportunities by account manager, region, or status. Use integrated Crystal Reports® to gauge individual or team effectiveness and guide territory realignment or redistribution of your marketing spend. Receive automatic alerts on pending sales opportunities based on business conditions you define.

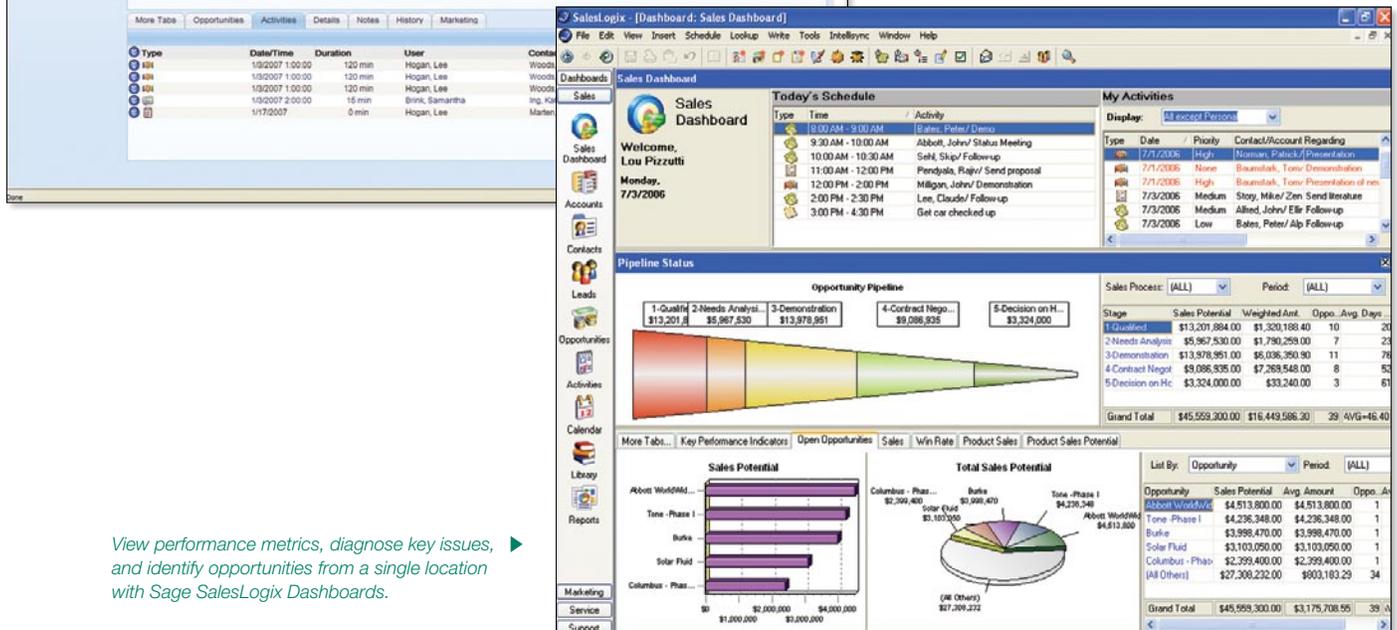

Truly Integrated CRM

Sage SalesLogix provides your sales team with a true 360-degree customer view, consolidating information from Sales, Marketing, Customer Service, and Support, so they can close more deals and increase customer satisfaction and retention.

Integration between Sage SalesLogix and your back-office accounting application provides your sales professionals access to the most current product information, pricing, discounts, and inventory when creating quotes or taking orders. In addition, without having to leave Sage SalesLogix, they can view all relevant customer data, such as credit status, terms, and account balance so they can better service customers.

▶ The Sage SalesLogix Web Client provides users with anytime, anywhere access to Sage SalesLogix and your critical customer data through a Web browser.
