# Applying LAN Hot Fix 16 for Sage SalesLogix Version 7.5.2

---

This hot fix addresses the following issues:

Defect	Description
1-77452	Conflict resolution fails when the only rule is "made the most recent change" and more than one remote user makes updates.
1-78685	Conflict resolution fails when two or more remotes change an opportunity's status.

This hot fix requires version 7.5.2. Do not install this hot fix on any other Sage SalesLogix version. Contact your support representative or go to <http://support.saleslogix.com> to obtain the hot fix.

**Note** For best results, Sage highly recommends installing version 7.5.2 LAN Hot Fixes 17 and 19 with 7.5.2 LAN Hot Fix 16.

## File Information

File Name	File Contents
SLX_v752_HF16.zip	SalesLogix v752 HF16.sxb
SalesLogix v752 HF16.sxb	System:Opportunity Detail form- Modified the script on the form.

## Applying the Hot Fix

Install the bundle using the Administrator. For details on finding the changes to the script, see ["Finding Script Changes" on page 2](#).

**Note** Before installing the hot fix bundle, create a bundle of all customized plugins in your database. Sage SalesLogix does not overwrite your customized plugins. However, this bundle can be used as a backup of your customizations.

### To install the bundle

1. Close all Sage SalesLogix applications on the computer to which you are applying the hot fix.
2. Extract the contents of the **SLX\_v752\_HF16.zip** file to a temporary folder.
3. Open the Administrator.
4. On the **Navigation Bar**, click **Bundles**.
5. Click **Install**.
6. Navigate to the folder where you extracted the hot fix files and double-click the bundle named **SalesLogix v752 HF16.sxb**.

7. After the bundle is loaded, the **Choose Actions to Install** dialog box appears. View the plugins to be installed with this release, and then click **OK**.
8. During installation, click **Yes** or **Yes to All** on any confirmation message boxes for overwriting system plugins.
9. In the **Choose Teams** dialog box, select the teams to which you want to release plugins, and then click **OK**.

## Finding Script Changes

Changes to Sage SalesLogix scripts, and scripts on forms, can be researched using a third-party comparison utility such as Beyond Compare or Microsoft Word. You can use the following example procedure to determine the Sage SalesLogix script changes in this release. Then, use that information to update your custom scripts with the Sage SalesLogix changes, or add your customizations to the Sage SalesLogix script.

### To find script changes

1. Apply the upgrade bundle to a test environment.
2. Open the original version of the script or form you want to research in the Architect.
3. Right-click the script, and then click **Select All**.
4. Copy and paste the information to a text editor, such as **WordPad**.
5. Save the script with the version number in the name.
6. Repeat steps 2 - 5 for the same plugin updated in this release.
7. Open the original plugin version in **Microsoft Word** (saved in step 5).
8. On the **Tools** menu, click **Compare and Merge Documents**.
9. Browse to and select the updated plugin (saved in step 6) and click **Merge**.
10. View the code changes and determine how to merge the Sage SalesLogix changes with your customizations.
