Applying Hot Fix 2 for Sage SalesLogix Version 7.2.2

This hot fix addresses the following issue:

Defect	Description
1-60401	Export to Excel may not include all fields if you are using custom tables or views.

This hot fix requires version 7.2.2. Do not install this hot fix on any other Sage SalesLogix version. Contact your support representative or go to http://www.support.saleslogix.com to obtain the hot fix.

File Information

File Name	File Contents
SLX_v722_HF2.zip	SLXControls.ocx and SalesLogix v722 HF2.sxb
SalesLogix v722 HF2.sxb	**System:Notes History Common** - Modified to use SQLFieldName property rather than FieldName (4 instances in the script) since the Sage SalesLogix OLE DB provider does not allow aliases in the "ORDER BY" clause.

Applying the Hot Fix

Apply the hot fix to all computers where the Sage SalesLogix Client is installed. Then, install the bundle using the Administrator.

To apply

1. Close all Sage SalesLogix applications on the computer to which you are applying the hot fix.
2. Extract the contents of the **SLX_v722_HF2.zip** file to a temporary folder.
3. Navigate to the folder where you extracted the hot fix files and double-click **SLX_v722_HF2.exe**.
4. On the **SalesLogix - v7.2.2 Hot Fix 2** screen, select your installation method:
   - **Install the SalesLogix Hot Fix** extracts the hot fix files to a temporary folder and removes the files once the installation is complete.
   - **Extract and Install the SalesLogix Hot Fix** extracts the hot fix files to a location you specify. The files are not removed once the installation is complete. If you choose this option, select a location where you want to store the hot fix files.
5. Click **Next**.

6. On the **Welcome** screen, click **Install**.

   The Update Network Images button is available on the Welcome screen. If you created automated installations of the Sage SalesLogix Client, you can upgrade the installations to hot fix 2 using this option (you must browse to the .msi file and click Update).

   Automated installations can be used to install the Sage SalesLogix Client for new users. When the automated installation is updated using this method, it contains the initial version of the Sage SalesLogix Client and all service packs and hot fixes applied to your system.
7. On the **Completed** screen, click **Finish**.

To install the bundle

1. Close all Sage SalesLogix Client applications.
2. Open the Administrator.

   Start > Programs > Sage SalesLogix > Administrator.
3. On the Navigation Bar, click **Bundles**.
4. Click **Install**.
5. Browse to and double-click the bundle named **SalesLogix v722 HF2.sxb**.
6. After the bundle is loaded, the **Choose Actions to Install** dialog box appears. View the plugins to be installed with this release, and then click **OK**.
7. During installation, click **Yes** or **Yes to All** on any confirmation message boxes for overwriting system plugins.
8. In the **Choose Teams** dialog box, select the teams to which you want to release plugins, and then click **OK**.
