# Applying Hot Fix 7 for Sage SalesLogix Version 7.0.2

---

This hot fix addresses the following issues:

Defect	Description
1-60980	Various currency fields display the incorrect currency symbol where an MLD file exists on an English machine. This issue originally fixed in v7.0.2 Hot Fix 1.
1-60982	The Network Client may display the date in an incorrect language if the .mld dictionary contains a blank language column. This issue originally fixed in v7.0.2 Hot Fix 1.
1-61438	In Query Builder, when deleting a condition of a copied group the condition below it is removed instead. This issue originally fixed in v7.0.2 Hot Fix 1.
1-61464	Exception EStringListError: List index out of bounds error when deleting the last condition of a copied group in a particular scenario. This issue originally fixed in v7.0.2 Hot Fix 1.
1-61558	An Exception EString List error appears when deleting the last condition of a copied group that has a closing parenthesis. This issue originally fixed in v7.0.2 Hot Fix 1.
1-62199	When you select the box to complete a Sales Process stage or step, the data grid refocuses to the first row. This issue originally fixed in v7.0.2 Hot Fix 2.
1-62992	When you are updating sales process stages using the Update Sales Process Stages dialog box and you choose and complete a stage other than the first stage, the focus returns to the first stage in the process. This issue originally fixed in v7.0.2 Hot Fix 2.
1-64838	Moving a contact from one owner to another generates an update statement instead of an insert statement. This issue originally fixed in v7.0.2 Hot Fix 4.
1-65231	If you use the toolbar to schedule an activity from the Account view, the conflict warning does not display when activities overlap.
1-65520	Send to SLX does not correspond to the correct Contact and Account if a different Ticket is selected before sending

This hot fix requires version 7.0.2. Do not install this hot fix on any other SalesLogix version. Contact your support representative or go to <http://support.saleslogix.com> to obtain the hot fix.

---

## File Information

File Name	File Contents
SLX_v702_HF7.zip	SalesLogix.exe and SLXControls.ocx & SalesLogix v702 HF4.sxb
SalesLogix v702 HF4.sxb	<ul style="list-style-type: none"><li>• Opportunity: Sales Process - Modified the script on the form.</li><li>• System: Move Contact - Modified the script on the form.</li><li>• System: SP_Update Stages - Modified the script on the form.</li></ul>

## Applying the Hot Fix

Apply the hot fix to all computers where the Sage SalesLogix Client is installed. Then, apply the hot fix bundle using the Administrator.

### To apply the hot fix patch

1. Close all Sage SalesLogix applications on the computer to which you are applying the hot fix.
2. Extract the contents of the **SLX\_v702\_HF7.zip** file to a temporary folder.
3. Navigate to the folder where you extracted the hot fix files and double-click **SLX\_v702\_HF7.exe**.
4. On the **SalesLogix - v7.0.2 Hot Fix 7** screen, select your installation method:
  - **Install the SalesLogix Hot Fix** extracts the hot fix files to a temporary folder and removes the files once the installation is complete.
  - **Extract and Install the SalesLogix Hot Fix** extracts the hot fix files to a location you specify. The files are not removed once the installation is complete. If you choose this option, select a location where you want to store the hot fix files.
5. Click **Next**.
6. On the **Welcome** screen, click **Install**.

The Update Network Images button is available on the Welcome screen. If you created automated installations of the Sage SalesLogix Client, you can upgrade the installations to hot fix 7 using this option (you must browse to the .msi file and click Update).

Automated installations can be used to install the Sage SalesLogix Client for new users. When the automated installation is updated using this method, it contains the initial version of the Sage SalesLogix Client and all service packs and hot fixes applied to your system.
7. On the **Completed** screen, click **Finish**.

### To install the hot fix bundle

1. Open the Administrator.  
Start>Programs>Sage SalesLogix>Administrator.
2. On the Navigation Bar, click **Bundles**.
3. Click **Install**.
4. Browse to and double-click the bundle named **SalesLogix v702 HF4.sxb**.
5. After the bundle is loaded, the **Choose Actions to Install** dialog box appears. View the plugins to be installed with this release, and then click **OK**.
6. During installation, click **Yes** or **Yes to All** on any confirmation message boxes for overwriting system plugins.
7. In the **Choose Teams** dialog box, select the teams to which you want to release plugins, and then click **OK**.
