Applying LAN Hot Fix 05 for Sage SalesLogix Version 7.5.2

This hot fix addresses the following issues:

Defect	Description
1-72679	Reports show up multiple times in the LAN Client.
1-73480	An error occurs when running a label report: "Invalid Crystal SQLQueryString".

This hot fix requires version 7.5.2. Do not install this hot fix on any other Sage SalesLogix version. Contact your support representative or go to http://support.saleslogix.com to obtain the hot fix.

File Information

File Name	File Contents
SLX_v752_HF05.zip	SalesLogix v752 HF5.sxb
SalesLogix v752 HF5.sxb	VBScript System:SLX Crystal Report
	VBScript System:SLX Report Controller
	Forms System:SLX Report Manager View: Modified the script on the form.

Applying the Hot Fix

Install the bundle using the Administrator. For details on finding the changes to the script, see the section .

Note Before installing the bundle, back up any customizations. The plugins in the bundle are saved as v7.5.2 and may overwrite your existing plugins with the hot fix version.

To install the bundle

1. Close all Sage SalesLogix applications on the computer to which you are applying the hot fix.
1. Extract the contents of the **SLX_v752_HF05.zip** file to a temporary folder.
2. Open the **Administrator**.
3. On the **Navigation Bar**, click **Bundles**.
4. Click **Install**.
5. Navigate to the folder where you extracted the hot fix files and double-click the bundle named **SalesLogix v752 HF5.sxb**.
6. After the bundle is loaded, the **Choose Actions to Install** dialog box appears. View the plugins to be installed with this release, and then click **OK**.

7. During installation, click **Yes** or **Yes to All** on any confirmation message boxes for overwriting system plugins.

8. In the **Choose Teams** dialog box, select the teams to which you want to release plugins, and then click **OK**.

Finding Script Changes

Changes to Sage SalesLogix scripts, and scripts on forms, can be researched using a third-party comparison utility such as Beyond Compare or Microsoft Word. You can use the following example procedure to determine the Sage SalesLogix script changes in this release. Then, use that information to update your custom scripts with the Sage SalesLogix changes, or add your customizations to the Sage SalesLogix script.

To find script changes

1. Apply the upgrade bundle to a test environment.
2. Open the original version of the script or form you want to research in the **Architect**.
3. Right-click the script, and then click **Select All**.
4. Copy and paste the information to a text editor, such as **WordPad**.
5. Save the script with the version number in the name.
6. Repeat steps 2 - 5 for the same plugin updated in this release.
7. Open the original plugin version in **Microsoft Word** (saved in step 5).
8. On the **Tools** menu, click **Compare and Merge Documents**.
9. Browse to and select the updated plugin (saved in step 6) and click **Merge**.
10. View the code changes and determine how to merge the Sage SalesLogix changes with your customizations.
