Applying the Update

Apply the update to all computers where the Sage SalesLogix Network Client and Admin Tools and Servers are installed.

To apply

1. Close all Sage SalesLogix applications on the computer to which you are applying the update.
2. Extract the contents of the **SLX_v754_Update07.zip** file to a temporary folder.
3. Navigate to the folder where you extracted the update files and double-click **SLX_v754_Update07.exe**.
4. On the **SalesLogix - v7.5.4 Update 07** screen, select your installation method:
 - **Install the SalesLogix Update** extracts the update files to a temporary folder and removes the files once the installation is complete.
 - **Extract and Install the SalesLogix Update** extracts the update files to a location you specify. The files are not removed once the installation is complete. If you choose this option, select a location where you want to store the update files.
5. Click **Next**.
6. On the **Welcome** screen, click **Install**, to install the patch.

Note The Update Network Images button is available on the Welcome screen. If you created automated installations of the Sage SalesLogix Client, you can upgrade the installations to update 07 using this option. (You must browse to the .msi file and click **Update**. After the status bar indicates the install is finished, exit the install screen by clicking **Cancel**.)

Automated installations can be used to install the Sage SalesLogix Client for new users. When the automated installation is updated using this method, it contains the initial version of the Sage SalesLogix Client and all service packs and updates applied to your system.

7. After the installation is completed, click **Finish**.
