# Applying Web Update 07 for Sage SalesLogix Version 7.5.4

---

This document describes Web Update 07 for Sage SalesLogix version 7.5.4.

## Prerequisites

Prior to installing this Web Update, ensure you have applied all of the following Update packages in the order listed:

- 7.5.4 Web Update 01
- 7.5.4 Web Update 02
- 7.5.4 Web Update 03
- 7.5.4 Web Update 04
- 7.5.4 Web Update 05
- 7.5.4 Web Update 06

Do not install Web Update 07 for Sage SalesLogix 7.5.4 on any other Sage SalesLogix version.

## Accessing Sage SalesLogix v7.5.4 Updates

This and other updates are available through your support representative or the Sage Support Portal Web sites.

### To access the Support portals

1. Use one of the following URLs to access a portal:
  - For partners: [partners.sagenorthamerica.com](https://partners.sagenorthamerica.com).
  - For customers: [customers.sagenorthamerica.com](https://customers.sagenorthamerica.com).
2. Browse to **Knowledgebase**, and click either **For Customers** or **For Partners**.
3. Click **Sage SalesLogix, Sage SalesLogix (version number), General Downloads**.

## Issues Fixed in This Update

Web Update 07 for Sage SalesLogix version 7.5.4 addresses the following issues:

All defect descriptions apply to the Sage SalesLogix Web Client unless the defect description specifically states otherwise.

Defect	Description
12089800	When using the Swedish Language Pack and editing an opportunity product, the error "'undefined' is null or not an object" occurs.
12091160	Firefox only. When creating a new contact or lead, if the name is entered into text field instead of the popup dialog, when the record is saved the name is lost and displays as ",,".
12091175	AutoPostBack is missing from RenderContents of Sage.SalesLogix.Web.dll v7.5.4.7129.
12091176	Using Windows Authentication uses more than one concurrent user license for each logon.
12091178	Filters created in the Application Architect using Standard SalesLogix IDs are displayed as a UserID rather than the user name like the Account Manager filter.
12091181	When deleting an account with custom code applied to the OnAfterUpdate rule, the error "The server request timed out" occurs.
12091182	Select Another Address does not use the selected address.
12091183	When deleting a lead that has activities. the error "Cannot access a disposed object. Object name : 'Ado Transaction'" occurs.
12091184	During insert of a opportunity, when attempting to remove a product, the error "style' is null or not an object" error occurs.
13091304	The Sage.SalesLogix.Web.Controls.resources.dll does not include the resource string LookupControl_Header. This resource is currently being loaded each time a lookup control is generated, and since it cannot be found an exception error occurs.
13091367	A large amount of steps in a sales process can cause delays when completing steps in the Web Client.
13091432	The Opportunity Sales Process tab does not always save user selections when selecting step check boxes.

This update addresses the following Accounting Integration issues:

Defect	Description
12088385	Adding a new Accounting System endpoint returns an "Object Referenced" error message.
12090809	Address and contact records that are merged from a SalesLogix record are not synchronized to X3 after completing a check for duplicate, and then merging.

## Applying the Update

This Web Update affects the following portals:

- Process Host
- SData
- Sage SalesLogix Web Client
- Sage SalesLogix disconnected Web Client
- Customer Portal
- Intellisync
- Lead Capture
- Web Reporting

Install this update to all computers with the following components installed:

- Application Architect

Install the Sage SalesLogix v7.5.4 Web Update07 VFS Upgrade.zip bundle using the Application Architect, and then build and deploy your Web site(s).

### To begin the install

1. Close all Sage SalesLogix applications on the computer to which you are applying the update.
2. Extract the contents of the **SLX\_754\_Web\_Update07.zip** file to a temporary folder.
3. Navigate to the folder where you extracted the update files and double-click **SLX\_754\_Web\_Update07.exe**.

4. On the **SalesLogix - v7.5.4 Web Update 07** screen select one of the following:
  - a. Select the **Extract and Install the Sage SalesLogix Update** option. The Update files, including the VFS bundle, are extracted to the location you specify. The files are not removed once the installation is complete. Selecting the other option prevents the VFS bundle from being available after the patch is installed, since the files are then deleted.
  - b. Click **Change** to select the location where you want to store the update files.
 

There is a folder path character limitation that requires the path where you save or copy bundles that are created in the Application Architect to be 57 characters or less (including the drive name).

    - **Install the SalesLogix Update** extracts the update files to a temporary folder and removes the files once the installation is complete.
    - **Extract and Install the SalesLogix Update** extracts the update files to a location you specify. The files are not removed once the installation is complete. If you choose this option, select a location where you want to store the update files.
5. Click **Next**.
6. On the **Welcome** screen, click **Install** to install the patch.
7. On the **Completed** screen, click **Finish**.

## Installing the VFS Bundle

Install the Sage SalesLogix v7.5.4 Web Update07 VFS Upgrade.zip bundle using the Sage SalesLogix Application Architect.

### To install the bundle

1. Ensure you have **Write** permissions to the bundle installation folder. Check permissions on the Security tab on the folder properties.
2. Open the **Application Architect**.
3. In the **Project Explorer**, right-click the project, and then click **Install Bundle**.
4. Navigate to the folder where you extracted the Update files, click **Sage SalesLogix v7.5.4 Web Update07 VFS Upgrade.zip**, and then click **Open**.
5. On the **Select Bundle** screen, click **Next**.
6. On the **Select Items** screen, ensure the **Portals** option is selected.
7. Click **Next**, and then click **Finish**.

## Building and Deploying the Web Changes

To make your changes available, you must build and deploy the Web portal(s).

### To build and deploy

1. In the **Project Explorer**, click the project.
2. Press and hold the **CTRL** key, and then on the **Build** menu, click **Build Web Platform**. All the files in the entire assembly for the current project are compiled. Status for the build is displayed in the Output Window at the bottom of the screen.
3. When the build is complete, on the **View** menu, click **Deployment Explorer**.
4. Expand **Deployments**.

5. Double-click the portal to deploy.
6. Under **Deployment Targets**, right-click the target portal, and click **Deploy Portal**. A status box appears indicating status for the deployment.

- By default, the Sage SalesLogix Web Client portal is set to deploy to the localhost, but you can change these settings to fit your environment.
- Changes will not be visible to the disconnected Web Client and/or Web remote Office until after the next Sync cycle.

7. Repeat these steps for each of the affected portals.
