# Introduction

Infor CRM is a leading customer relationship management solution that enables small to medium-sized businesses to acquire, retain, and develop profitable customer relationships through integrated Sales, Marketing, Customer Service, and Support automation solutions.

## About this guide

This document describes Web Model Update 01 for version 8.2.

## Prerequisites

The following software must be installed before installing this update:

- Infor CRM version 8.2
- 8.2 SNC Update 01
- Web Core Update 01 for version 8.2

Do not install Web Model Update 01 for 8.2 on any other version.

- **Internet Explorer 10 only:** A supported version of Microsoft .NET Framework must be installed on the Web Host server in order to support Internet Explorer 10.
  - Microsoft .NET Framework v4.5.1 (recommended) - This version of .NET Framework will run concurrently with versions 3.5 and earlier, but will replace .NET Framework versions 4.0 and 4.5. Microsoft .NET Framework 4.5.1 can be downloaded from the Microsoft site: <http://www.microsoft.com/en-us/download/details.aspx?id=41641>

This link was valid at the time this document was distributed. If this link is no longer valid, search the <http://www.microsoft.com> site for ".NET Framework 4.5.1" for the correct location and select either the Offline or Web Installer version.

- Microsoft .NET Framework v3.5.1 - If your environment does not support Microsoft .NET Framework v4.5.1, then you must apply two Microsoft hot fixes to support Internet Explorer 10. These hot fixes can be downloaded from:  
<http://support.microsoft.com/kb/2600100>  
<http://support.microsoft.com/kb/2608565>

These links were valid at the time this document was distributed. If these links are no longer valid, search the <http://www.microsoft.com> site for "KB2600100" and "KB2608565"

## Contacting Infor

If you have questions about Infor products, go to the Infor Xtreme Support portal at [www.infor.com/inforxtreme](http://www.infor.com/inforxtreme).

If we update this document after the product release, we will post the new version on this website. We recommend that you check this website periodically for updated documentation.

If you have comments about Infor documentation, contact [documentation@infor.com](mailto:documentation@infor.com).

---

# Chapter 1

## Changes in this Update

# 1

This chapter lists all of the changes to Infor CRM (Saleslogix) since version 8.2.

### Features added in this update

Web Model Update 01 for Infor CRM version 8.2 includes the following new features:

#### Web Client

- Ability to update multiple fields for multiple records, including the ability to update the account manager or account owner after an import
- Ability to delete multiple records
- Import History Detail view has a link to the import ad hoc group that contains the records that were successfully imported
- Features for Administrators and those with appropriate role access:
  - Filter Manager is now Entity Manager which enables the management of entity filters, metrics, and fields
  - Ability to add fields
  - Area/Category/Issue management including ability to manage auto assignment
- The Language list now includes English (UK)

#### Application Architect

- To support meta data discovery, the Data Type field was changed from text to a picklist

See the “What’s New in this Release” topic in the online Help systems for more information about the new features.

### Issues fixed in this update

Web Model Update 01 for Infor CRM version 8.2 addresses the following issues:

All defect descriptions apply to the Infor CRM Web Client unless the defect description specifically states otherwise.

Defect	Description
INFORCRM-1328	The progress bar in the menu bar has been restyled. .
INFORCRM-3407	The Address control on the Address tab has been updated to apply new styling to checkboxes use the new style and to fix width and height issues.
INFORCRM-3426	Clicking on Outlook Sync Options then clicking OK to close causes Microsoft Outlook to stop functioning.
INFORCRM-3433	The time zone is inconsistent with time zone in the time zone setting dialog.
INFORCRM-3434	The Web Client time zone does not reflect setting on computer.
INFORCRM-3448	Inconsistent show/hide behavior in context menu on an iPad.
INFORCRM-3456	When signing in to the Web Client on a local machine with a timezone different than the Web Host server the error "Unable to get timezone from client, using server timezone." occurs.
INFORCRM-3465	The 'Create Opportunity after Lead conversion or merge' check box on the Convert Lead dialog box is not styled correctly.
INFORCRM-3468	The Import History title should be right aligned.
INFORCRM-3482	The text on the folder in the Library is white with a light grey background making it very hard to read.
INFORCRM-3484	In an Internet Explorer 10 browser, when scheduling an activity from a step in a sales process the General tab may not display correctly or at all.
INFORCRM-3486	In a localized environment, if the sales order status is Closed, most of the boxes in the detail view should not be available to be edited.
INFORCRM-3493	In an Internet Explorer 10 browser drop-down list arrows display with a gray background.
INFORCRM-3513	In a localized environment, the Edit Global Join fields Visibility and Cascade Type open as blank when using Internet Explorer or Chrome.
INFORCRM-3592	An error occurs when moving between records in the Sync History detail view.
INFORCRM-3625	Add the ability to update multiple fields and multiple records as part of a bulk update.
INFORCRM-3658	In a Chinese (Traditional) environment, some labels are not translated.
INFORCRM-3659	In a Chinese environment, newly created widgets field names are not translated.
INFORCRM-3664	In a Chinese (Traditional) environment the Welcome Page is not translated.
INFORCRM-3694	In a Chinese environment, labels on the Associate a Contact view are not aligned correctly.
INFORCRM-3700	In a Chinese (Traditional) environment, the Follow Up label on the Complete an Activity view is not aligned correctly.
INFORCRM-3707	In a Chinese (Traditional) environment, the boxes on the Opportunity Sales Process snapshot view are not aligned correctly.
INFORCRM-3724	Change the Filter Manager name to Entity Manager.
INFORCRM-3731	Add the ability to filter picklist items by another picklist.
INFORCRM-3738	Add Area/Category/Issue management to the Web Client.
INFORCRM-3760	Replace update Multiple Opportunities, update Leads, and Delete Leads with the new bulk update feature.
INFORCRM-3773	Address.Entitytype is now populated upon the creation of a new address.
INFORCRM-3774	Add the ability to allow HTML tags on a page by page basis.

Defect	Description
INFORCRM-3790	On the Sales Order detail view, the Billing Address and Shipping Address labels are not aligned correctly.
INFORCRM-3796	On the Import History detail view, add a link to the import ad-hoc group created after performing an import.
INFORCRM-3813	In a localized environment, when using Outlook sync, the contact, account, lead, phone number, and company should be localized in the body of the Microsoft Outlook appointment.
INFORCRM-3847	Account and contact owner is set to Everyone even though the Import owner is set to another user.
INFORCRM-3878	On the Campaign detail view Targets tab manually selected records are not cleared after selecting Clear All.
INFORCRM-3934	An error occurs when filtering Import History list view by Create Date.
INFORCRM-3967	Add a Quick Form solution to allow entry of XML in form fields without receiving validation errors.
INFORCRM-4018	Add an Entity filter to the Import History list view.
INFORCRM-4062	The 64-bit version of the slxotl32.dll will not register on a system with a 64-bit version of Microsoft Office.
INFORCRM-4109	The Modules section of the web.config does not register the TimeZoneModule. for IIS 7 (integrated).
INFORCRM-4125	The Web Client uses the Web Host server time zone rather than local workstation time zone.
INFORCRM-4137	Add English (UK) to the language list on the sign on page and User Preferences tab in Options.
INFORCRM-4157	When updating multiple opportunities, updating Add to Forecast causes the error "There was an unknown error in response to an HTTP request".
INFORCRM-4218	Integration records should display the version number for troubleshooting purposes.
INFORCRM-4327	Browser language overrides the Opportunity Closed Won Lost Actual Amount currency.
INFORCRM-4688	The Personal Activity icon in the Web Client help does not match the icon on the Calendar or Activities list view.

# Chapter 2

## Applying the Update

# 2

This Web Model Update affects the following portals:

- SData
- Web Client
- Offline Web Client
- Customer Portal
- SDataCustomerPortal

## Installing VFS bundles

Install VFS .zip bundles using the Application Architect.

### To install the bundles

1. Extract the contents of the **Infor\_CRM\_v820\_Web\_Model\_Update\_01.zip** file to a temporary folder.
2. Ensure you have **Write** permissions to the bundle installation folder. Check permissions on the Security tab on the folder properties.
3. Open the **Application Architect**.
4. On the **View** menu, click **Bundle Manager**.
5. Click **Install**.
6. Select **Filename** and navigate to the folder where you extracted the Update files, click **ICRM v8.2.0 VFS Web Model Update 01.zip**, and then click **Open**.
7. On the **Select Bundle** screen, click **Next**.

- If you have customized your Web Client files, you may receive a message that the bundle contains items that conflict with existing items in this project. See the Application Architect help file topic called 'Merging Changes During Bundle Installation' for instructions before continuing to install the bundle.

8. On the **Select Items** screen, ensure the **Portals** option is selected.
9. Click **Next**, and then click **Finish**.

If an error occurs when applying the bundle, click No to close the error, click Cancel to stop installing the bundle, and sign out of the Application Architect. Reopen the Application Architect and follow the steps to install the bundle.

## Building and deploying the Web changes

To make your changes available, you must build and deploy the Web portal(s).

### To build and deploy

1. In the **Project Explorer**, click the project.
2. Press and hold the **CTRL** key, and then on the **Build** menu, click **Build Web Platform**. All the files in the entire assembly for the current project are compiled. Status for the build is displayed in the Output Window at the bottom of the screen.
3. When the build is complete, on the **View** menu, click **Deployment Explorer**.
4. Expand **Deployments**.
5. Double-click the portal to deploy.
6. Under **Deployment Targets**, right-click the target portal, and click **Deploy Portal**.  
View the status of the deployment in the Output window.

- By default, the Web Client portal is set to deploy to the localhost, but you can change these settings to fit your environment.
  - Changes will not be visible to the Offline Web Client and/or Web remote Office until after the next Sync cycle.
7. Repeat steps 1-6 for each of the affected portals.
