Infor completes acquisition of the assets of Saleslogix

I'm [pleased to announce](#) that Infor has completed the acquisition of the assets of Saleslogix. Based in New York City, Infor is a leading provider of business application software and cloud services, helping 70,000 customers in more than 200 countries and territories improve operations, drive growth, and quickly adapt to changes in business demands.

The Saleslogix customer relationship management (CRM) software addresses a key need for our customers in a number of industries and will strengthen Infor's Marketing Management product suite by adding strong sales and service functionality to Infor's industry-focused CloudSuites. In addition, Saleslogix will easily integrate with Infor enterprise resource planning (ERP) and finance systems, allowing users to manage the full customer lifecycle in one environment. Saleslogix is perfectly aligned with Infor's strategy to offer customers complete, cloud-enabled applications that feature beautiful design and are engineered for speed.

Through this acquisition, we believe you will benefit from the strength and stability of partnering with one of the largest enterprise application providers in the world, with a focus on product innovation and customer value, and a commitment to research and development.

Infor realizes that transactions like these can create uncertainty for you. We want to assure you of Infor's continued commitment to your success and, as with Infor's prior product acquisitions, we are working hard to avoid disruptions in your service as a result of this change.

The Saleslogix product will be our go-forward cloud CRM offering and will be renamed Infor

CRM™. Infor plans to continue investment in the development of the product, including increased scalability, refreshed user interface with Infor's leading UX designs, and added industry-specific functionality that unifies front- and back-office data and processes. The Saleslogix team, including leadership, has joined Infor, and Infor intends to invest in and grow the team as well as the product. With our uniquely talented development team, Infor is well-positioned to expand its development efforts and product direction for the acquired products, further demonstrating our commitment to being a leading innovator in enterprise software, integration, and mobile, and social technologies.
