

Saleslogix Compatibility Checklist

Updated October 2013

Saleslogix Compatibility Checklist

Updated October 2013

Contents

Key	2
Saleslogix System Requirements	2
Mobile System Requirements (v5.5 and earlier)	21
Mobile System Requirements (v5.6 and later)	17
Mobile System Requirements (v11R1, v1.1 through v3.0)	17
Notes	21
Important Information	23

Key.

The software requirements show all qualified software for use with versions of Saleslogix that have not reached end of life.

Q Component is tested and qualified for version. Troubleshooting assistance is available with Support plan.

Note: When a service pack number is listed instead of either “Q” or “S”, the version is qualified to work on that service pack, unless a superscript number indicates otherwise.

S Component is not tested for version. Troubleshooting assistance available with Support plan.

NC Component is not compatible for version. Troubleshooting assistance is not available.

A blank, gray box indicates the version of the software was not available until after this version of Saleslogix was released².

Saleslogix System Requirements

Version	v7.5	v7.5.1	v7.5.2	v7.5.3	v7.5.4	v8.0 ⁵
Windows Client						
Hardware¹						
Memory: minimum/recommended (MB)	256/512+	256/512+	256/512+	256/512+	256/512+	2GB/4GB
CPU/processor/ minimum/recommended (MHz)	800/1GHz+	800/1GHz+	800/1GHz+	800/1GHz+	800/1GHz+	2GHz/2.5 GHz+
CPU cores						2/4
Hard drive speed	7200RPM	7200RPM	7200RPM	7200RPM	7200RPM	7200RPM
Free disk space for application files (MB)	200+	200+	200+	200+	200+	10 GB
<i>Remote Client requires minimum additional 250+ MB free disk space for database and sync files (Depends on subscription rules and account ownership which increase size of database)</i>

Free disk space for application files (MB)	2000+	2000+	2000+	2000+	2000+	10GB\40GB
For advanced implementations, consider 16 GB memory, 2.3 GHz CPU, Solid State hard drive speed, and 8 cores.						
Operating System						
Microsoft Windows Server 2012						Q for SLX 8.0 plus updates ²⁴
Microsoft Windows 2008 R2 Server			Q	Q	SP1	SP1
Microsoft Windows 2008 Server	Q	Q	SP2	SP2	SP2	SP2
Microsoft Windows 2003 Server	SP2	SP2	SP2	SP2	SP2	SP2
Microsoft Windows 2000 Server/Advanced Server	NC	NC	NC	NC	NC	NC
MDAC 2.8	Q	Q	Q	Q	Q	Q

Version	v7.5	v7.5.1	v7.5.2	v7.5.3	v7.5.4	v8.0 ⁵
Relational Database Management System (RDBMS)						
Microsoft SQL 2012						Q ²⁰
Microsoft SQL Server 2008 R2				Q	SP1 ²	SP1
Microsoft SQL Server 2008	Q	Q	SP1	SP1	SP1	SP1
Microsoft SQL Server 2005	SP1	SP1	SP3	SP3	SP3	SP3
Microsoft SQL Server 2000	NC	NC	NC	NC	NC	NC
SQL Replication: Merge and Snapshot Replication are "NC" for Saleslogix. Transactional Replication is "S"						
Oracle 11g R2					Q	Q
Oracle 11g	Q	Q	Q	Q	Q	S
Oracle 10g R2 (minimum of 10.2.0.1.0 required)	Q	Q	Q	Q	Q	Q
Oracle 9i R2 (minimum 9.2.0.4 required with ISO 8859-1 character set)	S	S	S	S	S	NC
Oracle Client/OLE DB Provider Compatibility: Oracle Client software is a required component on each machine making a connection to a Saleslogix Oracle database. Though the Oracle Client software may be cross-compatible between versions, it is assumed that, when possible, the installed Oracle Client software matches the Oracle server version. If the Oracle OLEDB Provider DOES NOT match the major release version of the database software, it is assumed that the OLEDB components will be the latest available from the vendor.						
Email Servers						
Microsoft Exchange	Q	Q	Q	Q	Q	Q

Notes

¹ Hardware requirements are intended as a guideline. As Saleslogix is highly customizable, hardware requirements will depend on the number of users, activities, database size, number of records, operating systems, and RDBMS, among other factors. Microsoft Windows 7 and later, and Microsoft Windows 2008 and later typically require more powerful hardware. Performance for the Web Client components is also impacted by browser type and version, and by connection bandwidth.

² Saleslogix generally does not perform additional qualification testing on a released version of Saleslogix with newer service packs for operating systems and applications.

³ Active Mail features are not available when using Firefox v3.x with Saleslogix v 7.5.3 and earlier. In Saleslogix v7.5.4, Active Mail was ported into Desktop Integration, which is qualified for Firefox 3.6.x.

⁴ Internet Explorer 8 must run in Compatibility View with Saleslogix v7.5.2.

⁵ When installing Saleslogix v8.0 on a 64-bit system, Export to Excel, Send SLX, and Mail Merge require integration with 32-bit versions of Microsoft Office products. See the Saleslogix Implementation Guide for additional environment-specific adjustments to installation.

⁶ NET Framework is required if hosting a portal (for example, remote client).

⁷ IIS must run in v6 mode for all versions except Saleslogix v8.0.

⁸ Microsoft Windows 2008 requires Crystal Reports XI R2 SP4 or later.

¹⁴ Works with Saleslogix v7.5.3 with HF1, HF2, HF3, and SData core portal.

¹⁵ Saleslogix 7.5.3 hot fix 10 enables support for synchronization on the Remote Client. This hot fix is not required if your installation does not include Remotes.

¹⁶ For all installations except Web Reporting, Saleslogix installs Microsoft.Net Framework v4.0 if it is not detected on the computer. Having earlier versions of .Net installed alongside 4.0 will not create a problem. Microsoft .Net Framework 2.0 is required for Web Reporting.

¹⁷ Large data sets and/or many simultaneous users will require more RAM.

¹⁸ Recommend 10 GB or greater when TIBCO Spotfire Server 3.3 is configured with database on the same machine.

¹⁹ For all OS, 32 and 64-bit are supported.

²⁰ Microsoft SQL Server 2012 (any version) cannot be installed on the XP, 2003 Server, or 2003 R2 Server operating systems. When upgrading your database to Microsoft SQL 2012 and then creating remotes using SQL Express 2012, any remote users running Windows XP or 2003 Server will not be able to attach the remote database because they cannot install SQL Express 2012

²¹ NET 4.0 is installed in Integration mode. .NET 2.0 is installed in Classic mode to accommodate Crystal Reports.

²² When installing on 64-bit systems, run in native compatibility mode.

²³ Saleslogix Advanced Analytics v 1.0 is replaced by v1.1, which can be used with both Oracle and SQL.

Notes for Enabling Support for Microsoft Windows 8, Windows Server 2012, Office 2013, Internet Explorer 10, and Firefox 17

²⁴ Updates to Saleslogix version 8.0 include fixes to enable support for Microsoft Windows 8, Windows Server 2012, Internet Explorer 10, and Firefox 17. Use the following table to determine which updates are required for each operating system and/or browser. See the document called *Installing Saleslogix on Microsoft Windows 8, Windows Server 2012, and Internet Explorer 10* for additional required installation steps. This document is available in the Update zips.

²⁵ Desktop integration does not work with Firefox 17. If your Saleslogix Web Client implementation includes Desktop Integration, do not use Firefox 17.

²⁶ When Saleslogix 8.0 LAN Client implementations include both Advanced Outlook Integration and Microsoft Outlook 2013, install 8.0 SNC Update 08. No other compatibility issues with Microsoft Office 2013 programs have been identified.

²⁷ Coming soon: Knowledgebase article on enabling support for Intellisync with Microsoft Outlook 2013 32-bit.

8.0 Updates	Windows 8	Windows Server 2012	Internet Explorer 10	Outlook 2013

8.0 SNC Update 08				X ²⁶

Notes for Saleslogix Mobile v11R1, 1.1, 1.2, 2.0, 2.1, and 2.2

^{M1} When deploying Mobile version 1.2 with Saleslogix 8.0 through the Application Architect, do not use the provided mobile portal as that uses Saleslogix Mobile version 2.0 as the base application.

^{M2} To be compatible with Saleslogix v7.5.4, Mobile 2.0 recurring activity support and activity location are disabled. Recurring activities are visible but cannot be manipulated.

^{M3} In Saleslogix Mobile 2.2, some new features leverage improvements in the device operating systems. The my attachments, uploading an attachment, and viewing an attachment features are not available when Mobile 2.2 is installed on iOS5 and earlier, or on Android 2x.

Notes for Saleslogix Mobile versions 6.0 and Earlier

⁹ Operating system versions are carrier-specific. Be sure to use the operating system and/or upgrades provided by your carrier. The version of Desktop Manager required depends on the OS version of the device.

¹⁰ See related Hot Fix; applies to BlackBerry OS builds 5.0.0.386 and higher.

¹¹ Saleslogix Mobile versions 5.1 and 5.5 should be installed separately from Saleslogix. The platform should be installed on a dedicated server which is not functioning as a domain controller. The following are automatically installed and validated through the Mobile Platform Setup: ASP.NET 2.0 and J# 2.0 (for BlackBerry).

¹² A Microsoft Win32 command prompt utility for ad hoc, interactive execution of Transact-SQL statements and scripts requirement when database server is a different server than the Web server.

¹³ Personal Server is not available in v5.6 and later.

Important Information

For products not listed (for example, Visual Analyzer), visit the Saleslogix Knowledgebase on the Partner or Customer Support Portal Web sites:

- <http://www.slxinternal.sagesalesLogixcloud.com/partners>
- <http://www.slxinternal.sagesalesLogixcloud.com/customers>

Search by product name and the word "Compatibility".
